Forecast for Monday 21 Aug 2023

Weather: Areas of low cloud and mist developing during the early hours and perhaps a few fog patches in the valleys too. This clearing after dawn to leave increasingly frequent sunny intervals during the morning. An isolated shower may bubble up through the middle of the day, but most of the region will remain dry with increasing amounts of sunshine later in the day.

Chance of cloud-free hill tops above 600m: 40% becoming 95%.

Low cloud and visibility: Fairly extensive cloud above 400-500m at first, lifting above all summits by the end of the morning. Locally poor visibility in morning cloud and in any heavier showers but generally good visibility with far-reaching views through the afternoon and evening.
